Portfolio

TECHNICAL SKILLS

- **Front-End:** Javascript, React.Js, Redux, RestAPI, Bootstrap, Tailwind, HTML5, CSS3, SCSS (Sass)
- **Back-End:** Node.js, Express.js
- **Database:** MongoDB, MySQL
- **Developer Tools:** Webpack, Git, VS Code

EXPERIENCE

Front-End Developer Jun. 2021 – Aug. 2024

Tata Consultancy Services Kolkata, West Bengal

- Developed responsive web UI of an online multiplayer gaming platform in React, Tailwind CSS and Socket.io (for realtime games) - developed 30+ reusable components, worked closely with the UI team and Product team from ideation phase to production phase - the application is currently live in 7 countries and ready to be launched in 4+ countries.
- Implemented lazy loading strategies for images and components, reducing initial page load time by 22% and improving overall user experience.
- Conducted thorough performance audits using core web vitals to identify and address potential bottlenecks, ensuring optimal page rendering and interaction times.
- Employed resource hinting techniques to preload critical assets, further enhancing page load speed by 8% and user interaction.
- Implemented debouncing technique to optimize event handling, improving the overall performance of the web page.

PROJECTS

MobiBattle mobibattle.com

Online Multiplayer Gaming Platform

- Implemented real-time game functionality using Socket.io, enabling players to engage in multiplayer battles with instant updates and communication.
- Integrated RESTful APIs to fetch and display game data, user profiles, and leaderboards within the application.
- Ensured cross-browser compatibility and responsiveness, making the platform accessible to a wide range of users.

Content Management System

Internal Corporate Tool

- Developing user and role management modules UI for seamless account and access management.
- Handling user permissions in the system to ensure controlled data access.
- Creating a user-friendly interface to manage single upload and bulk uploads of media content using .csv files, with the goal of optimizing data processing efficiency.
