PROFESSIONAL SUMMARY:

MM.Sc. Global Software Development student (Hochschule Fulda) with 4+ years of experience building fullstack web applications across frontend and backend. Currently working as a Fullstack Developer Intern at KeyOne, delivering features in React, TypeScript, NestJS, and managing CI/CD pipelines via Azure DevOps with automated deployment to Azure App Services. Experienced in agile development, code reviews, automated testing (Jest, Cypress), and MS SQL Server in production. Interested in open source software development and contributing to modular platform architectures.

PROFESSIONAL EXPERIENCE:

KeyOne, BadHomburg, Germany | Fullstack Developer Intern

March 2026 – Present

- Set up and maintain CI/CD pipelines in Azure DevOps, automating build, test, and deployment workflows for backend APIs, configuring Azure App Services, and managing release pipelines that deploy to production without manual intervention
- Manage MS SQL Server in production via Azure DevOps; handle schema changes through TypeORM versioned migrations with `synchronize: false` to protect live data integrity across environments
- Build and maintain cross-platform features for Web, Android, and iOS in React, TypeScript, and React Native within a production Turborepo monorepo: shared component library (@keyone/ui) and hooks (@keyone/hooks) consumed across 3 separate apps
- Delivered 4+ features end-to-end independently, dynamic category filter, Spin-to-Win promotional campaign system, privacy-conscious user feedback flow, and a slug-generation system for 1,700+ affiliate merchant pages
- Write unit tests with Jest and end-to-end tests with Cypress for critical user flows; enforce code quality through TypeScript strict mode, ESLint, and active participation in code reviews
- Improved mobile SEO score from 73 to 97 using Ahrefs and Google Search Console; manage WordPress pages and blog via Elementor; develop and maintain NestJS microservices and PHP plugins

Tata Consultancy Services, Kolkata, India | Frontend Developer

Jun 2021 – Aug 2024

- Led frontend development for MobiBattle, a real-time multiplayer gaming platform: designed scalable, component-driven architecture in React and TypeScript integrating REST APIs for live game state and user data: React Architecture
- Reduced initial page load times by 22% through Core Web Vitals analysis and systematic resource management: Performance
- Built and maintained 30+ documented, reusable React components; authored technical documentation that accelerated team delivery across multiple product streams: Component Library
- Developed a scalable internal Content Management System handling thousands of concurrent users, full implementation from architecture to documentation: Enterprise CMS

ACADEMIC PROJECTS

Einkaufszentrum – Full-Stack University Marketplace | Global Distributive Software Development Project | [Link](#)

- Led frontend architecture for a distributed team of 6 using React and TypeScript; established coding standards and documentation practices that improved team velocity
- Implemented 15+ documented, testable React components following industry best practices; mentored teammates on Git workflows and modern frontend patterns
- Delivered production-ready application on schedule in a bi-weekly Scrum environment with full sprint planning participation

Netflix GPT – AI-Powered Recommendation Engine | [Link](#)

- Built a full-stack React web application integrating the OpenAI API and TMDB API to deliver AI-driven, personalised movie recommendations
- Implemented responsive, accessible UI with a focus on clean component architecture, custom hooks for API state, and user-friendly interaction flows
- Demonstrates hands-on experience connecting frontend interfaces to AI/ML systems — directly relevant to building chat and AI-driven interfaces

TECHNICAL PROFICIENCY:

Frontend: React.js, React Native, Redux, JavaScript (ES6+), TypeScript (strong), HTML5, CSS3, Tailwind CSS, Responsive Design, Expo

Backend & APIs: NestJS, Node.js, Express.js, REST API design, PHP, Python (basic)

CI/CD & DevOps: Azure DevOps, CI/CD pipelines, automated deployment, Azure App Services, Docker, Turborepo, GitHub Actions (familiar)

Databases: MS SQL Server, MySQL, MongoDB, Azure SQL, TypeORM, PostgreSQL (familiar)

Testing & Quality: Jest (unit tests), Cypress (end-to-end tests), test automation, ESLint, Prettier, TypeScript strict mode, code review

Version Control & Agile: Git, GitHub, GitLab, Azure DevOps, Agile/Scrum, sprint planning, interdisciplinary team collaboration

Other: WordPress, Elementor, Ahrefs, Google Search Console, SEO, open source development

EDUCATION:

M.Sc. Global Software Development

Hochschule Fulda | Fulda, Germany | Oct 2024 – Present

- **Relevant Coursework:** Building Web/Mobile Apps, Distributed Applications, Parallel Programming, Cloud Computing.
- Currently enrolled full-time; actively expanding knowledge in cloud architectures and distributed systems.

B.Tech Computer Science (GPA: 1.82)

Guru Nanak Dev University | Amritsar, India | 2017 – 2021

- Completed comprehensive curriculum with strong foundational knowledge in algorithms, software architecture, and systems design.
- Leadership: Team Lead for the Computer Engineering Student Society.

Languages:

English – Professional / Fluent **German** – A2, actively improving **Hindi** – Native
